Budget setup

☒ Use a template (simplified)
Use the recommended configurations. You can change some configuration options after the budget is created.

☐ Customize (advanced)
Customize a budget to set parameters specific to your use case. You can customize the time period, the start month, and specific accounts.

Billing View - optional
Select a billing view you want to create this data export for. This will not be editable after create. If no view is selected, this export will be created for your account data (primary view).

Templates - new
Choose a template that best matches your use case.

☐ Zero spend budget
Create a budget that notifies you once your spending exceeds \$0.01.

☒ Monthly cost budget
Create a monthly budget that notifies you if you exceed, or are forecasted to exceed, the budget amount.

☐ Daily Savings Plans coverage budget
Create a coverage budget for your Savings Plans that notifies you when you fall below the defined target.

☐ Daily reservation utilization budget
Create a utilization budget for your reservations that notifies you when you fall below the defined target.

Data Exports

Budget name
Provide a descriptive name for this budget.

Soyab

Names must be between 1-100 characters.

Enter your budgeted amount (\$)
Last month's cost: \$0.00

0.01

Email recipients
Specify the email recipients you want to notify when the threshold has exceeded.

Separate email addresses using commas

Maximum number of email recipients is 10.

Scope
All AWS services are in scope in this budget.

You will be notified when 1) your **actual spend** reaches 85% 2) your **actual spend** reaches 100% 3) if your **forecasted spend** is expected to reach 100%.

Template settings
This template has default configurations that can be changed later. To change any of these settings, see [Custom](#). You can also download this template in [JSON](#).
