

Assignment No.: 2

Problem Statement: Create MFA for authentication

Solution:

Step 1: Click Account name (top-right)

The screenshot shows the AWS Billing and Cost Management console. The top navigation bar includes the AWS logo, a search bar, and the account name 'Azeen (4431-1200-4937)'. The left sidebar shows the 'Billing and Cost Management' menu. The main content area displays the 'Budgets (1)' overview, indicating that a budget named 'Azeen' has been created successfully. The account details panel on the right shows the account name 'Azeen' and the account ID '4431-1200-4937'.

Step 2: Click Security credentials

The screenshot shows the AWS IAM console 'My security credentials' page for the root user. The page includes a warning that MFA is not assigned and a recommendation to assign it. The 'Account details' section shows the account name 'Azeen', the email address 'asyedazeen@gmail.com', and the AWS account ID '443112004937'. The 'Multi-factor authentication (MFA) (0)' section shows that no MFA devices are currently assigned. The 'Assign MFA device' button is highlighted in the bottom right corner.

Step 3: Click assign MFA device

us-east-1.console.aws.amazon.com/iam/home?region=eu-north-1#/security_credentials/mfa

aws Search [Alt+S]

Global Azeen (4431-1200-4937) Azeen

IAM > Security credentials > Assign MFA device

Step 1
● Select MFA device
○ Step 2
○ Set up device

Select MFA device Info

MFA device name

Device name
This name will be used within the identifying ARN for this device.

Azeen

Maximum 64 characters. Valid characters: A-Z, a-z, 0-9, and + = , . @ _ - (hyphen)

MFA device

Device options
In addition to username and password, you will use this device to authenticate into your account.

☐ Passkey or security key
Authenticate using your fingerprint, face, or screen lock. Create a passkey on this device or use another device, like a FIDO2 security key.

☒ Authenticator app
Authenticate using a code generated by an app installed on your mobile device or computer.

Step 4: Choose MFA Device Type(Authenticator app)->next

Step 5:Set up device ->add MFA

us-east-1.console.aws.amazon.com/iam/home?region=eu-north-1#/security_credentials/mfa

aws Search [Alt+S]

Global Azeen (4431-1200-4937) Azeen

IAM > Security credentials > Assign MFA device

Step 2
○ Step 1
● Set up device

Authenticator app

A virtual MFA device is an application running on your device that you can configure by scanning a QR code.

- 1 Install a compatible application such as Google Authenticator, Duo Mobile, or Authy app on your mobile device or computer.
[See a list of compatible applications](#)
- 2 
Open your authenticator app, choose **Show QR code** on this page, then use the app to scan the code. Alternatively, you can type a secret key.
[Show secret key](#)
- 3 Type two consecutive MFA codes below
Enter a code from your virtual app below
MFA Code 1
Wait 30 seconds, and enter a second code entry.
MFA Code 2

MFA device assigned

You can register up to 8 MFA devices of any combination of the currently supported MFA types with your AWS account root and IAM user. With multiple MFA devices, you only need one MFA device to sign in to the AWS console or create a session through the AWS CLI with that user.

Azeen asyee@azeen@gmail.com

AWS account ID 443112004937

Canonical user ID 4ca51ffe5daec82aa74d7974c4bee7ec4ae9e3d25ca306e52ade46c4769d2525

Multi-factor authentication (MFA) (1) Remove Resync Assign MFA device

Use MFA to increase the security of your AWS environment. Signing in with MFA requires an authentication code from an MFA device. Each user can have a maximum of 8 MFA devices assigned. [Learn more](#)

Type	Identifier	Certifications	Created on
☐ Virtual	arn:aws:iam::443112004937:mfa/Azeen	Not Applicable	Thu Jan 15 2026

Access keys (0) Create access key

Use access keys to send programmatic calls to AWS from the AWS CLI, AWS Tools for PowerShell, AWS SDKs, or direct AWS API calls. You can have a maximum of two access keys (active or inactive) at a time. [Learn more](#)

Access key ID	Created on	Access key last used	Region last used	Service last used	Status
No access keys					

As a best practice, avoid using long-term credentials like access keys. Instead, use tools which provide short-term credentials. [Learn more](#)
