

Assignment No.: 3

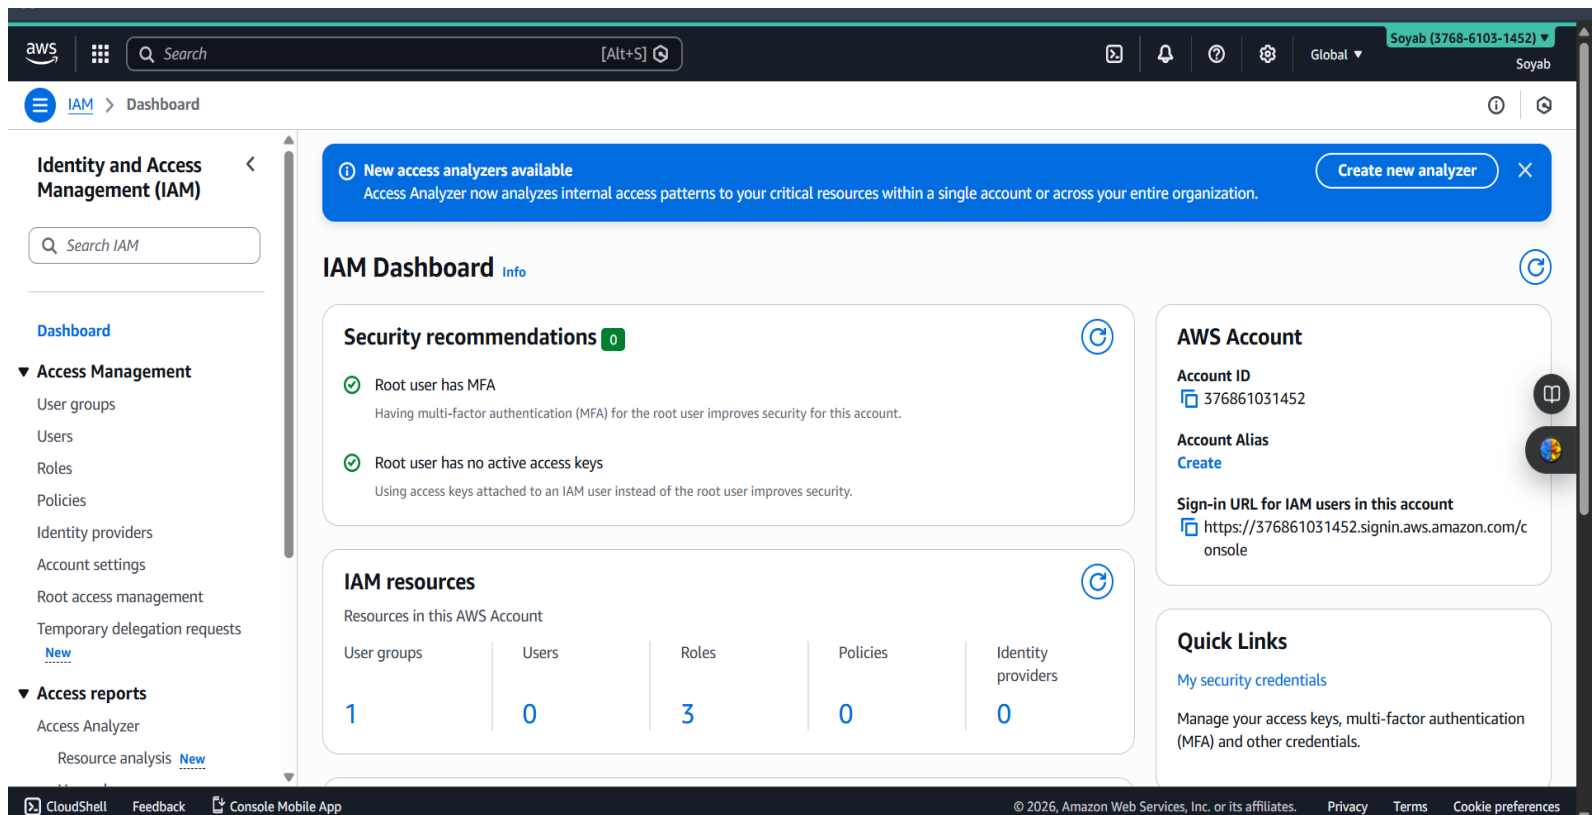

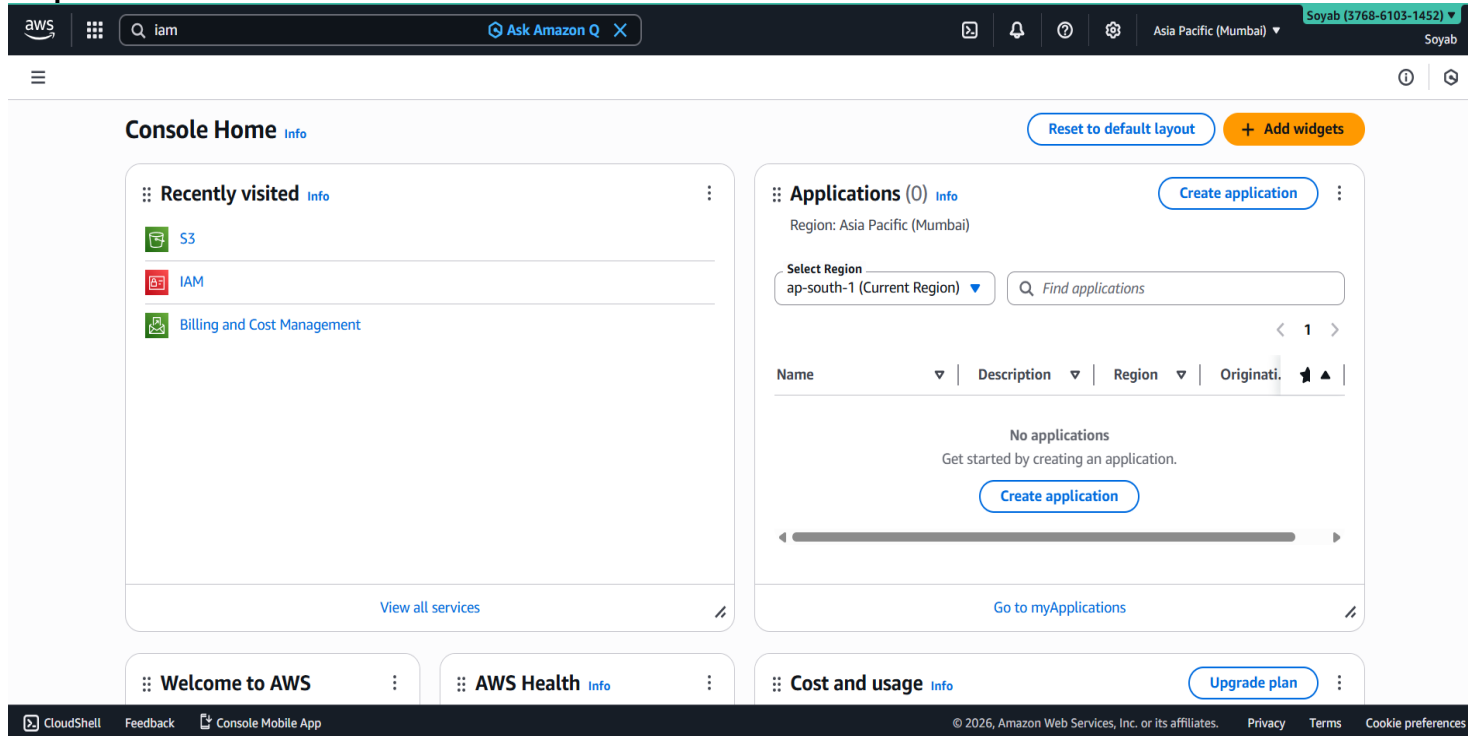

Problem Statement: Create IAM user and give full access to S3

Solution:

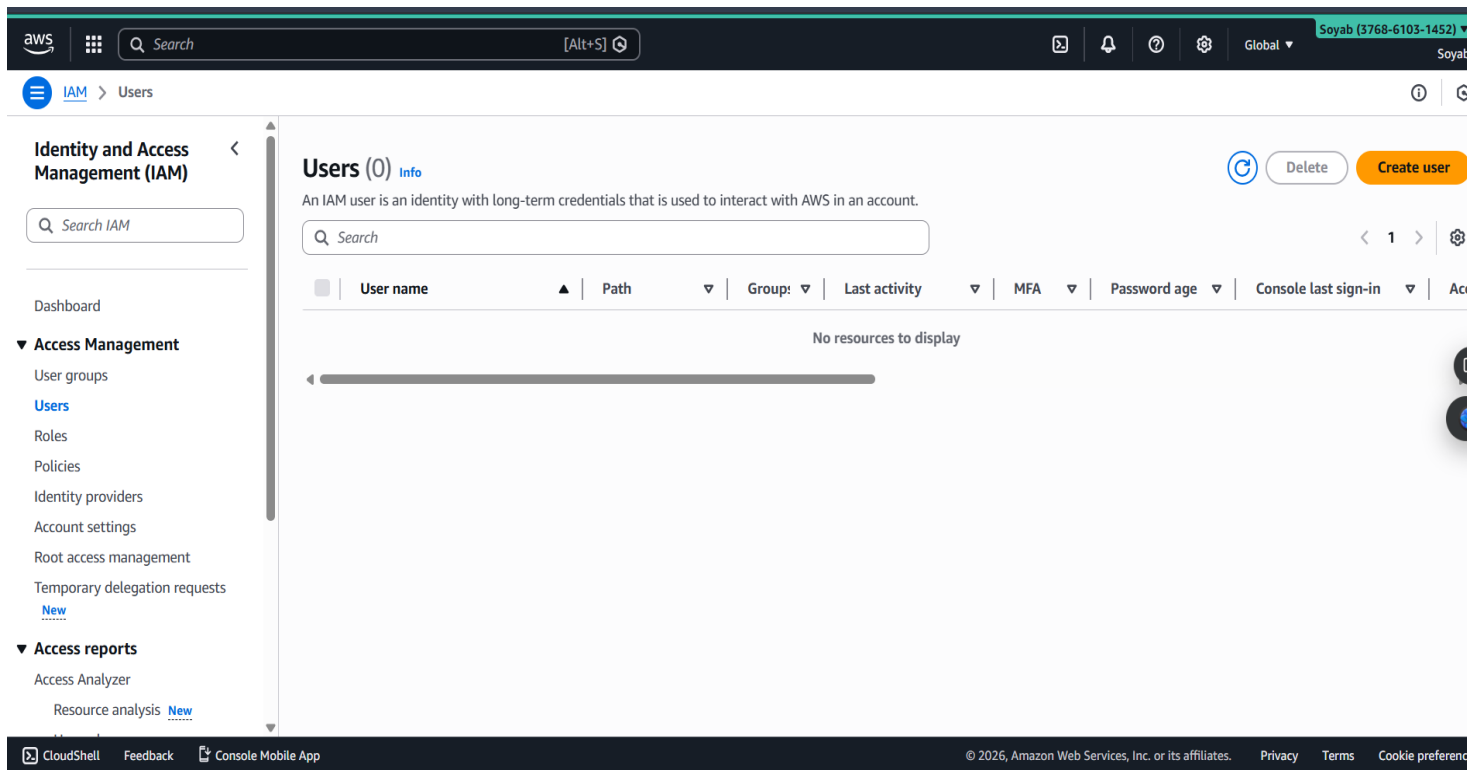

PART 1: Create IAM user

Step 1: Login to your AWS root account

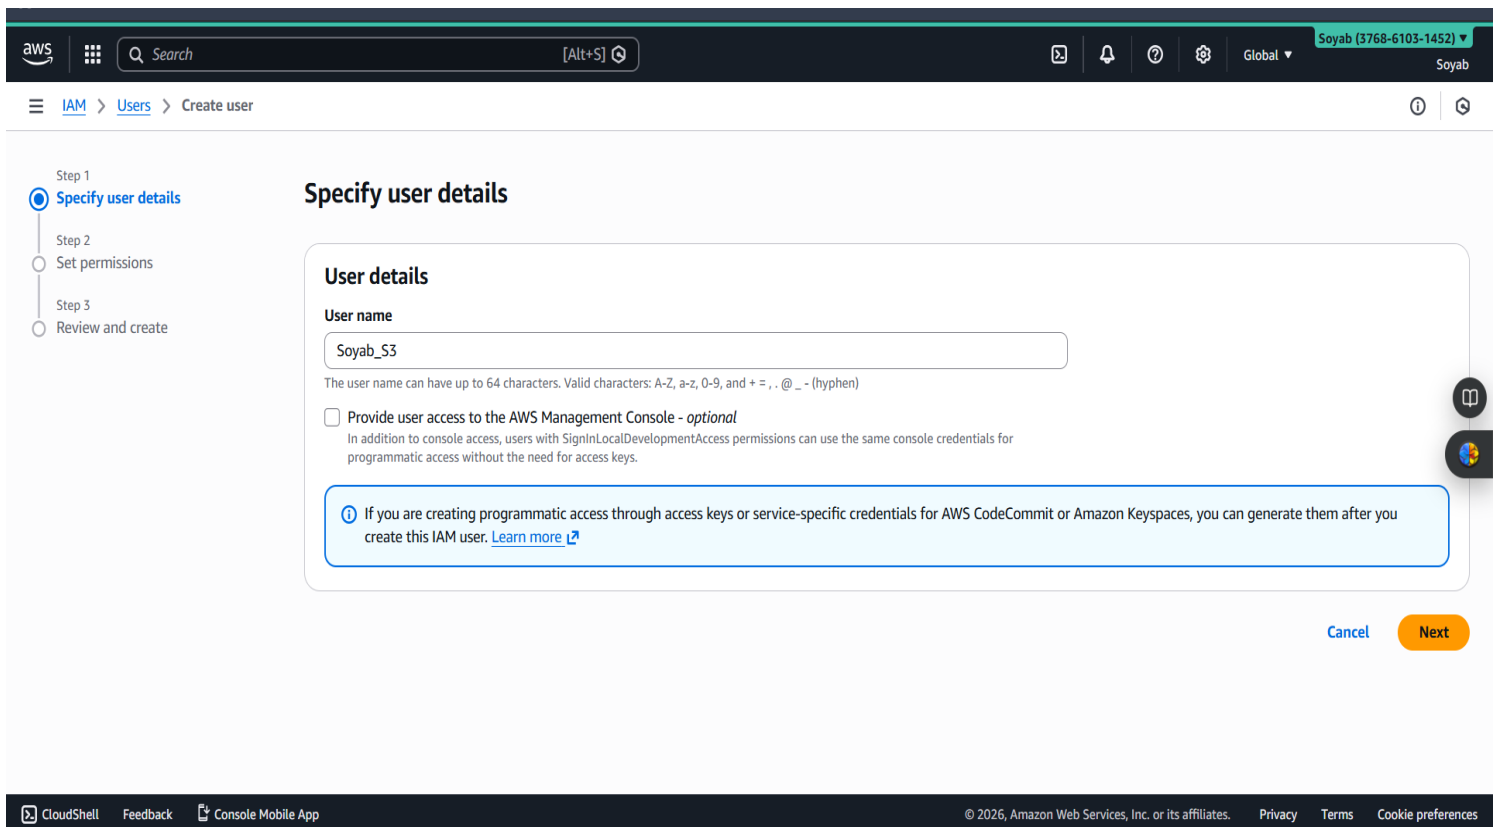

Step 2: Click on IAM

Step 3: Select Users from the Left panel

Step 4: Click on Create user on the top right

Step 5: Type your user name and click next

aws Search [Alt+S]

IAM > Users > Create user

Step 1 Specify user details
Step 2 Set permissions
Step 3 Review and create

Set permissions

Add user to an existing group or create a new one. Using groups is a best-practice way to manage user's permissions by job functions. [Learn more](#)

Permissions options

- ☒ Add user to group
Add user to an existing group, or create a new group. We recommend using groups to manage user permissions by job function.
- ☐ Copy permissions
Copy all group memberships, attached managed policies, and inline policies from an existing user.
- ☐ Attach policies directly
Attach a managed policy directly to a user. As a best practice, we recommend attaching policies to a group instead. Then, add the user to the appropriate group.

Get started with groups
Create a group and select policies to attach to the group. We recommend using groups to manage user permissions by job function, AWS service access, or custom permissions. [Learn more](#) [Create group](#)

► Set permissions boundary - optional

Step 6: Click on Create group

aws Search

IAM > Users > Create user

Step 1 Specify user details
Step 2 Set permissions
Step 3 Review and create

Create user group

Create a user group and select policies to attach to the group. We recommend using groups to manage user permissions by job function, AWS service access, or custom permissions. [Learn more](#)

User group name
Enter a meaningful name to identify this group.
Soyab_Group_S3
Maximum 128 characters. Use alphanumeric and '+', '=', '@', '-' characters.

Permissions policies (14/1110) [Create policy](#)

Filter by Type
Q s3 14 matches < 1 >

☒	Policy name	Type	Use...	Description
☒	AmazonDMSReds...	AWS managed	None	Provides access to manage S3 sets
☒	AmazonS3FullAcc...	AWS managed	None	Provides full access to all buckets
☒	AmazonS3ObjectL...	AWS managed	None	Provides AWS Lambda functions p
☒	AmazonS3Outpos...	AWS managed	None	Provides full access to Amazon S3
☒	AmazonS3Outpos...	AWS managed	None	Provides read only access to Amaz
☒	AmazonS3ReadO...	AWS managed	None	Provides read only access to all bu
☒	AmazonS3TableF...	AWS managed	None	Provides full access to all S3 tabl

Your user group is created successfully!
Step 8: Now select the group and click next.

aws [Search] [Alt+S] Global Soyab (3768-6103-1452) Soyab

IAM > Users > Create user

✔ Soyab_Group_S3 user group created with a few errors. See error description below.

Step 3
Review and create

User name Soyab_S3	Console password type None	Require password reset No
-----------------------	-------------------------------	------------------------------

Permissions summary

Name ↗	Type	Used as
Soyab_Group_S3	Group	Permissions group

Tags - optional

Tags are key-value pairs you can add to AWS resources to help identify, organize, or search for resources. Choose any tags you want to associate with this user.

No tags associated with the resource.

[Add new tag](#)

You can add up to 50 more tags.
